WEEKLY CROP BULLETIN.

For the Week Ending May 27, 1905.

Honolulu, T. H., May 29, 1905.

GENERAL SUMMARY.

The week has been marked by a decided decrease in the atmospheric pressure and a dying out of the trade winds which have blown steadily for the past two months. Accompanying these changes, temperatures have been high and the weather sultry in most sections.

The rainfall has been abundant in the Kona and windward districts of Hawaii; while in the Kau district there have been sufficient showers at the higher elevations to supply water for the fluming of cane, in addition to which present conditions give some slight promise of a break in the severe drought of the lower levels. Copious showers have fallen over the western portion of Maui, but dry weather has prevailed in central and eastern portions. The rainfall has been light in Oahu and Kauai.

Growing cane has made very good progress during the week under the influence of the calm sultry weather. The preparation of land and ratoons, the planting of seed cane, and the harvesting and grinding of mature cane continue. The mill at Pepecko, Hawaii, has shut down, and cane cutting will be finished this week at Koloa, Kauai. Pineapples are in good condition, and the plants in central Maui are advancing finely under the somewhat warmer and drier conditions which now obtain in that section. Rice is heading and ripening in Maui and Kauai, while the harvesting of early rice has already begun in portions of Hawaii and Oahu. Coffee trees are in good condition and are making very satisfactory growth. Although rain is much needed in most leeward sections, pastures and stock generally are in good condition. Sisal needs rain badly in Oahu, but is growing well in Maui. Farmers in central Maui are cutting barley and digging potatoes, both crops promising a heavy yield. Watermelons are coming into market in large quantities, and papaias, avocado pears and mangoes are becoming plentiful.

A light earthquake shock was felt at Kamuela, Hawaii, at 10:00 a. m. of the 22nd instant.

REMARKS BY CORRESPONDENTS.

ISLAND OF HAWAII.

Kaunama—Good growing weather continues, and all vegetation is making good progress; preparing ratoon for crop of 1907; stripping and harvesting cane.—J. E. Gamalielson.
Hilo—Weather warm and moist; crops in good condition.—L. C. Lyman.
Papaikou—Warm days and rainy nights; good growing weather and crops doing well; plowing land; planting weeding, stripping and harvesting cane.—John T. Moir.

Pepeecko—Good growing weather; mill shut down; plowing, planting, weeding and hoeing 1907 crop; stripping crop of 1906.—Jas. Webster.
Honoum—Weather continues favorable for growing cane; harvesting, stripping and planting cane.—Wm. Pullar.

Hakalau—Weather continues favorable for growing crops—sunshine with light showers; southerly wind during latter part of week; harvesting and planting cane.—Geo. Ross.
Ookala—Weather somewhat warmer, with less rain; planting and harvesting cane.—W. G. Walker.

Papaui—Higher temperatures and lighter winds throughout the week; young cane growing well; planting progressing rapidly.—H. Glass.

Kohala—The higher temperatures following the recent showers have been of much benefit to growing crops.—W. O. Taylor.

Kohala Mission—The week ends with rising temperature and close, still weather; all crops and pastures doing well; early rice is being harvested.—Dr. B. D. Bond.

Puakea Ranch—Early part of week rather dry, with high trade winds; last three days sultry, with light southerly breeze.—M. D. Mason.

Puuhoe Ranch—Fine weather for pastures and crops—warm days and cool nights; heavy downpour from the south during night of 23rd.—S. P. Woods.

Kamuela—The fresh trades have been followed by close, sultry weather and cloudy skies; light earthquake shock at 10:00 a. m. of the 22nd.—Mrs. E. W. Hay.

Puuhawaa—High winds during early part of week followed by beneficial showers and heavy fogs.—Robt. Hind.

Kealahou—1.47 inches of rain during week.—Rev. S. H. Davis.

Kealahou—Pine growing weather and good rains which extended to the beach.—Robt. Wallace.

Kau—1.05 inches of rain during week, and more rain threatening; crops and pastures improved.—F. H. Hayselden.

Naelehu—Light showers here on 20th, 21st and 24th, but the rainfall was heavier in the mountains, and has aided harvesting; winds more moderate. ★★★★★★★★★★

Lullu W Kalakaua and by Tr to Agnes C Galt, D; por gr 1639, Lillihia St, Honolulu, Oahu. \$1. B 269, p 198. Dated May 23, 1905.

Fred Harrison to Jas E Thompson, L; 1800 sq ft land and bldgs, Alakea St, Honolulu, Oahu. 5 yrs at \$1200 per an. B 263, p 481. Dated May 19, 1905.

Ariana E Austin (widow) et al to Haleakala Ranch Co, L; R P 2743 and 2986, Kaupo, Maui. 20 yrs; 7 yrs at \$600 per yr; 13 yrs at \$700 per yr. B 263, p 483. Dated Mar 1, 1905.

William R Castle to Maria de M Silva, Rel; lot 14 blk C, Nuanu tract, Honolulu, Oahu. \$145. B 259, p 50.

this week; some indication that the dry spell has broken up.—G. G. Kinney.

Pahala—Rains in the mountains have made it possible to flume cane, but weather is still very dry at the lower elevations.—H. D. Harrison.

Kapoho—Days warm and sultry, but nights cool with occasional light showers; young vegetation green, and stock looking well; light winds.—H. J. Lyman.

Olaa—Well at mill site completed—240 feet deep, with 22 feet of excellent water.—E. P. McCann.

ISLAND OF MAUI.

Kipahulu—Ideal weather for cane and other crops; plenty of water for fluming.—Andrew Gross.

Nahiku—Frequent showers, with warm days and very cool nights for this season of the year; vegetation of all kinds looking well, and stock in good condition.—C. O. Jacobs.

Huelo—Weather continues favorable for plant growth; all fruit trees bearing fairly well; stock of all kinds looking remarkably well, the improvement in their condition during the last few weeks being very noticeable; irrigation ditches running full.—W. F. Pogue.

Haku—Weather warmer and somewhat drier this week; pineapples and sisal advancing finely; plantation irrigation ditches running full; pastures and grazing stock in good condition.—D. D. Baldwin.

Makawao—Weather cloudy and warm, with light variable winds and occasional showers during week; cutting barley and digging potatoes; pastures and crops doing well, and stock in good condition.—E. H. Bailey.

Kahului—High temperatures, with plenty of sunshine and light winds during week.—R. W. Filler.

Puunene—Weather very warm during week, with light variable winds; considerable rain at ditch heads, and all pumps idle; planting for 1907 crop and milling 1906 crop of cane proceeding rapidly.—J. N. S. Williams.

Wailuku—Weather dry, cloudy and sultry all week; rice heading and ripening; market well supplied with garden truck; water getting scarce, and rain needed.—Bro. Frank.

Kihel—Good growing weather, although very dry; light winds; ditches slackening up, and appearances to windward indicate dry weather; plowing land fertilizing and harvesting cane.—James Scott.

Olowalu—Warm and cloudy weather favorable for growing crops; plowing land; hoeing and fertilizing cane.—George Gibb.

Kaanapali—Fine warm weather throughout week; all vegetation looking well; harvesting cane.—Wm. Robb.

ISLAND OF OAHU.

Maunawili—Weather showery, with a total rainfall of 2.12 inches during week; warm days; coffee and pastures improving.—John Herd.

Waimanalo—Warm weather, with 41 inch of rain during week.—A. Irvine.

Sisal—Very light showers during week but not enough to aid crops, which are suffering for want of rain; weather warmer, with light variable winds.—Wm. Weinrich, Jr.

Waianae—22 inch of rain fell here this week; night temperatures considerably higher, and growing crops progressing nicely.—F. Meyer.

Kakuku—Strong trades prevailed during early part of week, followed by a calm; latter part of week was warm and sultry and very favorable for growing crops; only .14 inch of rain this week; harvesting and grinding cane; marketing watermelons.—R. T. Christophersen.

ISLAND OF KAUAI.

Makaweli—28 inch of rain during week, with very warm weather during the last few days; harvesting cane and plowing land.—Hawaiian Sugar Co.

Eleele—Slight increase in rainfall over previous week, but conditions still very dry; weather warm and sultry.—McBryde Sugar Co.

SKIN TORTURES

And Every Distressing Irritation of the Skin and Scalp Instantly Relieved by a Bath with CUTICURA SOAP

And a single anointing with CUTICURA, the great skin cure and purifier of exfoliants. This is the purest, sweetest, most speedy, permanent, and economical treatment for torturing, disfiguring, itching, burning, scaly, crusted, and pimply skin and scalp humours with loss of hair, and has received the endorsement of physicians, chemists, and nurses throughout the world.

beautifying the skin, scalp, hair, and hands. No other foreign or domestic toilet soap, however expensive, is to be compared with it for all the purposes of the toilet, bath, and nursery. Thus it combines in ONE SOAP at ONE PRICE, the BEST skin and complexion soap, the BEST toilet soap and BEST baby soap in the world.

Complete External and Internal Treatment for Every Humour,
Consisting of CUTICURA SOAP, to cleanse the skin of crusts and scales and soften the thickened cuticle, CUTICURA Ointment, to instantly allay itching, inflammation, and irritation, and soothe and heal, and CUTICURA Resolvent, to cool and cleanse the blood. A SIXOLE SET is often sufficient to cure the most torturing, disfiguring, and humiliating skin, scalp, and blood humours, with loss of hair, when all else fails. Sold throughout the world. Aust. Depot: R. Towns & Co., Sydney, N. S. W. Ro. African Depot: LEXSON LTD., Cape Town. "All about the Skin, Scalp, and Hair," free. PORTER DRUG AND CHEM. CO., Sole Props., Boston, U.S.A.

Millions of Women

USE CUTICURA SOAP, exclusively, for preserving, purifying, and beautifying the skin, for cleaning the scalp of crusts, scales, and dandruff, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, in the form of baths for annoying irritations, inflammations, and chaffing, or too free or offensive perspiration, in the form of washes for alleviating weakness, and for many sanative antiseptic purposes which readily suggest themselves to women, and especially mothers, and for all the purposes of the toilet, bath, and nursery. No amount of persuasion can induce those who have once used it to use any other, especially for preserving and purifying the skin, scalp, and hair of infants and children. CUTICURA SOAP combines delicate emollient properties derived from CUTICURA, the great skin cure, with the purest of cleansing ingredients and the most refreshing of flower odours. No other medicated soap ever compounded is to be compared with it for preserving, purifying, and beautifying the skin, scalp, hair, and hands. No other foreign or domestic toilet soap, however expensive, is to be compared with it for all the purposes of the toilet, bath, and nursery. Thus it combines in ONE SOAP at ONE PRICE, the BEST skin and complexion soap, the BEST toilet soap and BEST baby soap in the world.

TALKING CANARY BIRDS.

Miraculous Powers Possessed by a Pretty Little Songster of Baltimore.

A beautiful little canary actually talking, speaking English clearly and sweetly—can you boys and girls imagine anything more pleasing? Yet that is just what a dainty little feathered mite, a pure yellow Harts mountain canary owned in Baltimore, does, says a writer in the Orange Judd Farmer. That most of the parrot tribe and crows and magpies have the power of speech nearly everyone knows, but that the little songsters who brighten so many homes throughout our broad land should be possessed of this power seems almost miraculous. It goes to prove how much we have yet to learn of things with which we call ourselves familiar.

This little Baltimore bird has a vocabulary of five words, "such a pretty, beautiful bird," which he enunciates very distinctly. He combines these in various ways, repeating and alternating to suit his fancy. "No effort was made to teach him his accomplishment," writes his mistress. "As a family we sincerely object to 'trained animals'; we like each to develop its own attractive personality. The canary is not yet a year old. It is our custom to talk much to our pets, and this little fellow was no exception. The words which he now repeats have been my aunt's usual greeting to him, and she would frequently repeat them to him.

"We mistook his first utterances for his baby attempts at singing, and were surprised into nervousness when later the clearly enunciated words formed the prelude of his very beautiful song."

In Hartford, Conn., is another canary who also talks, repeating very similar words, and laughing in imitation of his mistress. As with the Baltimore bird, no attempt was made to teach him, but his mistress talked to him a great deal as she worked near his cage. In both cases the birds have received the tenderest care. How delightful has been the reward.

HOW MANY MEN—

Like to be spoken of as possessing political influence.

Show a weakness for trailing in the wake of social awells.

Show a weakness for exhibiting a big roll of bank notes.

Speak of themselves as the gentlemanly end of politics.

Think themselves considerably smarter than every other man.

Boast of a fondness for children which never is in open evidence.

Want to be considered competent critics of music and the drama.

Carry letters in their coat pocket which should have been burned.

Base their opinions of a clergyman's sermon on his voice rather than on his argument.

Think it an evidence of great historic knowledge to talk of Waterloo, Wagram and the burning of Moscow.

—Philadelphia Bulletin.

Ascension Day services at St. Andrew's cathedral will be celebrations of the holy communion at 7 and 10 a. m. and evensong at 5 p. m. After evensong the fortieth anniversary of St. Andrew's priory will be celebrated.

BEWARE OF A COUGH.

Now is the time to get rid of that cough, for if you let it hang on no one can tell what the end may be. Others have been cured of their coughs very quickly by using Chamberlain's Cough Remedy. Why not you? For sale by all Dealers and Druggists. Benson Smith & Co., Ltd., agents, Honolulu.

Now dip this wedge into water, and you will find that the water will rise higher where the pieces of glass come together than at the open part, thus making a curved surface. Dip it into mercury and the curve will be reversed, the mercury having a lower level where the pieces of glass come together.

Kolon—Good growing weather, with 1.59 inches of rain; will finish cutting cane this week.—P. McLane.

Lihue—Dry weather, but calm and favorable for growth of cane.—F. Weber.

Keala—Warm and dry during first part of week changing to cool nights during latter part; rain on 26th, but irrigation ditches running low; reservoir supply of water still in reserve.—W. Jarvis.

Kilauea—Dry weather continues and rain is badly needed; winds light and variable since the 23d instant.—L. B. Boreiko.

Hanaelei—Rice heading and doing very well; pastures in good condition; 25th instant hottest day in Hanaelei this year.—E. G. K. Deverill.

A. MCC. ASHLEY,
Section Director.

MERCURY AND WATER.

Some Interesting Experiments Which May Be Performed with the Help of Glass Tubes.

Get a number of glass tubes, varying in size from a quarter of an inch in diameter to the slim thermometer tube. Thrust them into water and see the result as shown in the accompanying picture. The water will rise higher in the smaller tubes than in the larger and it will be higher at the sides of the tube than in the middle. This is due to the pressure of the air on the surface of the water, and to what is known as capillary attraction, this last causing the water to rise on the sides of the tube.

Now thrust the tubes into mercury, and an exactly opposite effect is produced, as shown in the darker picture for the mercury will have a lower level

DIAGRAMS OF THE EXPERIMENTS
inside the tubes than outside, and as it has a tendency to slip away from the glass surface rather than to cling to it, there is no capillary attraction, and it falls downward at the sides and curves upward in the center. Besides, it will rise higher in the larger tubes than in the smaller ones.

A similar experiment, says the Chicago Inter Ocean, may be made with two flat pieces of glass, placed together like a wedge, and held so by a broad rubber band, a piece of wood being placed at the top and the bottom of the open part, as shown in the illustration.

Now dip this wedge into water, and you will find that the water will rise higher where the pieces of glass come together than at the open part, thus making a curved surface. Dip it into mercury and the curve will be reversed, the mercury having a lower level where the pieces of glass come together.
